## Raised Funds to Support Childrens Education and Health

Thanks to the sponsors who supported us.

## Vavunathivu – The Area

Vavunathivu lies around 15 kms inland from the main Batticaloa town. It is an arid area where water is scarce. Due to this factor farming is not the most feasible livelihood method. Many family heads work as day wage earners and struggle to make ends meet. Scarcity of water and a poor infrastructure also leave a lot to be desired in the standard of education and other facilities available for the children in these communities. Health and sanitation facilities also need improvement

# Vavunathivu - Education

There are over 30 schools in this area, but most of the schools lack the needed facilities. Sufficient Qualified teachers are not available, and proper learning environments are hard to provide. The bright and eager minds of the children in these communities are starved of the proper education that is their right

## Our Findings

Our officers met with and discussed the main concerns of the families in the area. The candid discussions helped us to identify the areas that need improve. Subjects like science maths and English need special consideration

## A Mothers Opinion

The thoughts of one mother reflect the feelings of all the mothers here. “I appreciate any help that we receive for our children, I want to see my daughter grow up and be successful”

## Through a Childs Eyes

My parent work hard to provide my needs but I am sad because I cant give them the results they like to see because our schools don't have everything. I wish I could have proper opportunities to study the subjects I like.

## Fathers Woes

My children are my life, but we are so limited in what we can do to provide for our families. Seeing my children suffer like this breaks my heart. Any help that we receive would be so welcome
